

Using Technology Effectively in your Instruction

The First Nations Education Steering Committee and First Nations Schools Association are pleased to announce professional development workshops designed for staff who are interested in integrating technology more effectively in their daily instruction.

Holly is an education thought-leader, international speaker, best selling author and an advocate for students. She is a twenty-plus year educator who has spent over 15 years teaching in a 1:1 classroom and over five years as an administrator in both public and private schools. She holds a master's degree in Instructional Design and Educational Technology from Columbia University in New York City. Her passion is for helping teachers create classrooms where students want to learn and can become the agents of their own thinking and understanding.

Holly will be presenting a series of workshops for staff working in First Nation Schools. Workshops will be delivered for educators with a beginner level of understanding using technology in their instruction and for educators with a more advanced level of understanding. Sessions will be recorded but we recommend attending the live sessions to get the most from each workshop.

Session Host:
Holly Clark

Date	Time	Workshop Title
January 13	3:30-5:30	Technology for Richer Assessment Information - Beginner
January 20	3:30-5:30	Technology for Richer Assessment Information - Advanced
January 27	3:30-5:30	Technology for Richer Differentiation - Beginner
February 3	3:30-5:30	Technology for Richer Differentiation – Advanced
February 10	3:30-5:30	Technology for Demonstrations of Learning - Beginner
February 17	3:30-5:30	Technology for Demonstrations of Learning - Advanced
February 24	3:30-5:30	The Powerful Tools that Support Digital Pedagogy - Beginner
March 3	3:30-5:30	The Powerful Tools that Support Digital Pedagogy - Advanced

Using Technology Effectively in your Instruction – Session Overviews

Technology for Richer Assessment Information

Understanding where students are in their learning journey can help us become more effective facilitators. We will look at how to gather important data about how students are progressing toward their success criteria. Participants will learn how to think about assessment differently and more metacognitively. We will uncover how to get at student thinking and understanding in really rich ways using a short list of the most effective tools of technology for this task.

Technology for Richer Differentiation

Now that we have learned through our work in module one, to understand where students are in the learning process, we will take this information to provide valuable differentiated learning experiences. We will use the tools of technology to help students where they are, and to begin to facilitate the individualized process of making deep connections that allow for more multi-dimensional learning experiences.

Technology for Richer Differentiation

Now that we have learned through our work in module one, to understand where students are in the learning process, we will take this information to provide valuable differentiated learning experiences. We will use the tools of technology to help students where they are, and to begin to facilitate the individualized process of making deep connections that allow for more multi-dimensional learning experiences.

The Powerful Tools that Support Digital Pedagogy

To be determined based on participant feedback during the previous 3 sessions.
